

ANURAG BISHNOI

Software Engineer | Java & Spring Boot | GenAI & LLM | Banking Systems | 3+ Years Experience
Toronto, Ontario, Canada | +1 (416) 305-9605 | anuragbishnoi8@gmail.com | [linkedin.com/in/anuragbishnoi](https://www.linkedin.com/in/anuragbishnoi) | github.com/29rules | bishnoianurag.site

Software professional with 3+ years building automation solutions and enterprise banking platforms at Scotiabank. Strong expertise in Java, Spring Boot, REST APIs, SQL, and GenAI applications. Experienced in large-scale payment systems, backend integrations, and cloud-native development including Docker, CI/CD, and LLM-powered chatbot development.

EXPERIENCE

Scotiabank — Card Technology / eTeller	Toronto, ON
Senior QA Analyst	Aug 2022 – Present
- Designed and developed Java/Python automation services reducing test preparation effort by 40% across multiple retail banking releases, supporting ATM, PINPAD, and eTeller systems. - Engineered backend validation scripts using CL programs and Query/400 against DB2 and AS400 job logs to enforce data integrity across dependent banking systems. - Collaborated with architects on API contracts and system-level design for VISA/MC certification across contactless, contact, and eCommerce transaction flows. - Led Change Management and production incident response; conducted root cause analysis and delivered post-incident documentation for enterprise banking platforms.	
Scotiabank — Wealth Management	Toronto, ON
Investment Advisor Associate	Jan 2019 – Jul 2022
Supported client portfolio administration, regulatory compliance, and cross-departmental operations across Scotiabank's internal wealth management systems.	

PROJECTS

AI Chatbot – Agronex Trading – OpenAI GPT · LangChain · RAG · Python/Flask · React	Live Demo GitHub 2024
- Built a production RAG chatbot using OpenAI GPT and LangChain; grounded responses in a FAISS vector knowledge base eliminating hallucination on product specs and pricing. - Deployed Flask REST API on Render and React frontend on Vercel; wrote custom DirectOpenAIEmbeddings class to bypass a LangChain 0.1.6 api_key bug discovered in production.	
MiniBank Transaction Engine – Java · Spring Boot · REST APIs · SQL · Maven	github.com/29rules
Java + Spring Boot backend simulating real banking transaction logic — accounts, transfers, and audit trails with transactional integrity and REST API design patterns.	
AgroConnect World – Java · Spring Boot · React · MongoDB · Docker · GitHub Actions	github.com/29rules
Full-stack B2B platform with Spring Boot microservices covering auth, product catalog, and order flows; containerized with Docker and deployed via GitHub Actions CI/CD.	

SKILLS

Backend: Java (OOP, Collections), Spring Boot, REST APIs, Python, SQL	AI / LLM: OpenAI GPT API, LangChain, FAISS, RAG, Prompt Engineering
Frontend: React.js, JavaScript, HTML/CSS	Databases: SQL, DB2, AS400/iSeries (Query/400, CL), MongoDB
DevOps: Docker, GitHub Actions, Git, Nginx, CI/CD	Banking: ATM, PINPAD, eTeller, VISA/MC Certification, TSYS, FinSim, HP ALM

OTHER

- Certifications: Full-Stack Development (React, Spring Boot) | Automation Testing – Selenium | Canadian Securities Course (CSC) | 2023–Present
- Education: Diploma, Supply Chain Management – Northern College, Canada (Honors, 2018–2019) | BBA – Mahatma Gandhi University, India (2013–2016)
